Utility/Municipality

Wireless

19", RJ45-connect protector panels are a powerful solution for your connection or protection application. Our designs are aimed to give you the space savings and improved economy you are looking for. Modern day broadband (triple play) networks require custom high-density connection and protection solutions with low cross talk and insertion loss.

KEY PRODUCT BENEFITS

▶ Designed for use in integrated OSP Distribution Cabinets

▶ RJ45 output tail with custom lengths available

▶ Available with CAT5 wiring

▶ Low cross talk and insertion loss

▶ Compact, lightweight design

▶ Available in a variety of custom input configurations

▶ Operating Temperature: -13˚F to 149˚F (-25˚C to 65˚C)

INDUSTRY STANDARDS

▶ Designed to meet or exceed GR937 performance requirements
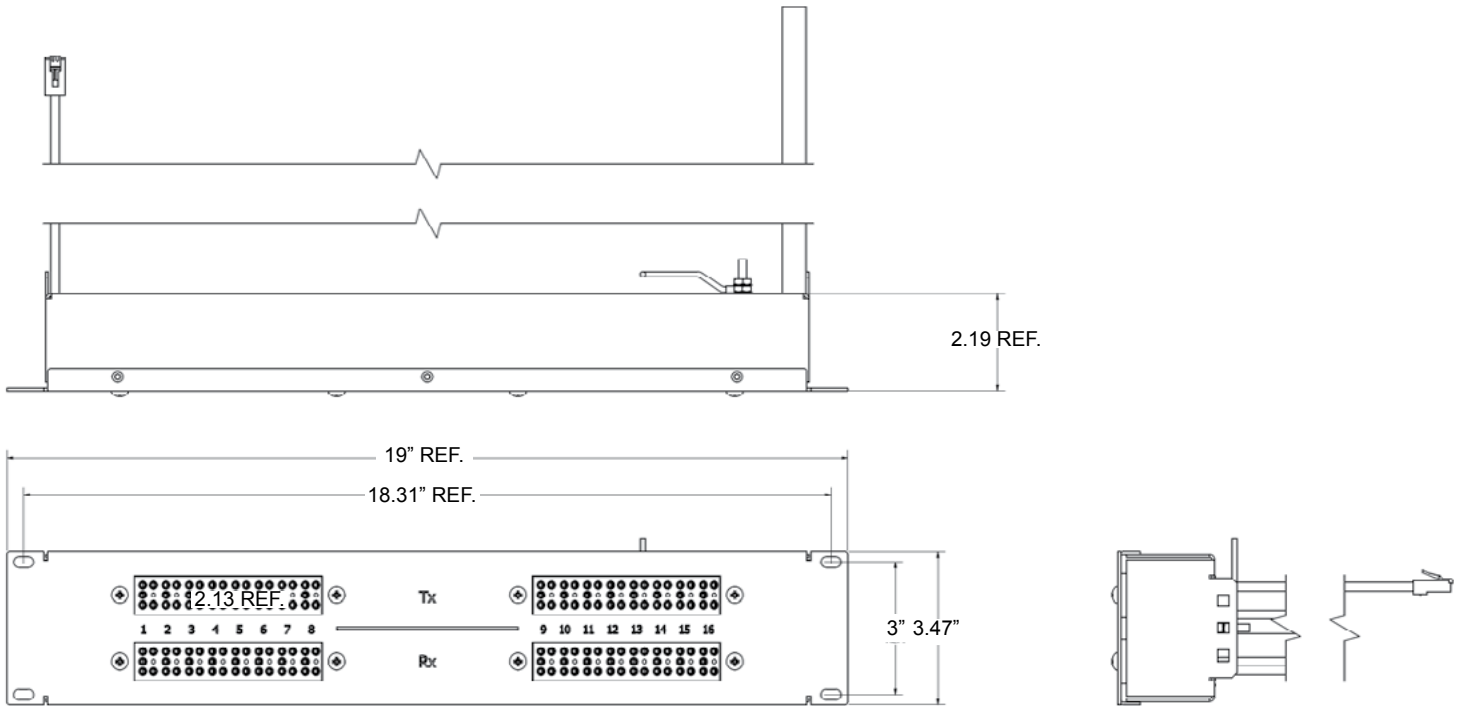

▶ ISO 9001:2000 registered facility
