Utility/Municipality

SVN-12

The SVN-12 Switchable Voice NID Adapter Panel is molded of flame retardant plastic resin and is designed to accommodate up to twelve 89 Two-Way Switching Modules.

The 89 Two-Way Switching Modules a two-way switchable voice module with an additional line termination which utilizes two microcontrollers to switch between the telephone service providers. Once the service has been posted to the second service providers, it stays in the mode till ringing voltage appears on the first service provider.

The 89 Two-Way Switching Modules termination for non-switched second line. Test points are provided to test the customer lines status. The 89 Two-Way Switching Module easily snap into the SVN-12 Switchable Voice NID Adapter Panel.

KEY PRODUCT BENEFITS

SVN-12 Switchable Voice NID Adapter Panel

- ▶ Compact design allows multiple 89 Two-Way Switching Module installation for multiple dwelling units
